

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant:	W. Jean Dodds	Examiner:	Pablo S. Whaley
Serial No.	10/635,707	Group Art Unit:	1631
Filed:	August 5, 2003	Docket No.	058034-011800
Customer No.:	33717	Confirmation No.:	8325
Title:	SYSTEM FOR ANIMAL HEALTH DIAGNOSIS		

CERTIFICATE OF TRANSMISSION

I hereby certify that this document is being transmitted electronically to the United States Patent and Trademark Office via the EFS Web e-Filing system on January 28, 2008.

Name: Kelly Simpson

DECLARATION OF W. JEAN DODDS IN SUPPORT OF PATENTABILITY

I, W Jean Dodds; declare as follows.

1. I am the Applicant in the above application.
2. I am also the inventor and patentee in the cited US patent 6,287,254 (Dodds).
3. The technology of the claims of the present application are directed to an invention which avoids the problems with cumbersome and potentially inaccurate diagnostic reporting of animal health conditions. The claims of the present application represent an important advance scientifically and technically over the technology of the claims of the my earlier Dodds patent, since they cover an diagnostic system for reporting enhanced reports in a manner never before done.
4. I consider myself a person having ordinary skill in the art of animal health diagnostics. I have been involved in the animal health diagnostics for about 40 years and am considered by my peers as a preeminent leader in the field. I am also aware of the different

techniques for reporting on animal health based on manual, computer and laboratory data. I have run my own laboratory in different forms for about 30 years. This is a main activity of my current business at www.hemolife.org . Over this time I have provided diagnosis for literally tens of thousands of animal conditions. Before my current invention of the present applications there was no computerized manner of diagnosing and delivering enhanced reports in animal medicine. I attach a copy of my resume as Exhibit A.

5. In view of my experience in the field of animal diagnosis, I believe that the icon was not an obvious development from the disclosures I made in Dodds.

6. Dodds simply does not teach, suggest or disclose in any sense a supplemental or enhanced report or a second computer program .

7. Dodds does not disclose, teach or suggest that an alternative embodiment of data interpretation performed by algorithm and outputted to a user via an expert interface can be by additional reports generated using a second program comprising menus and icons or GUIs.

8. Dodds is not a disclosure, teaching or suggestion of the present invention, and nor would it have been obvious to modify the teachings of my prior disclosure (Dodds) or would it have been obvious to try from my knowledge at the time to obtain the features of the present invention.

9. The functional and generated icons representing textual data define an important and patentable advance in the field of animal health diagnosis.

10. The icons are functional and are selected and used as follows::

- selected icons are selected and used to supplement the laboratory report
- the icons are used for animal characteristics dependant on age and sex, and animal characteristics dependant on animal grouping
- the icons are selected and used for groupings of at least three of the following animal groups, namely adult, puppy-adolescent, geriatric, large breed dog, or sight hound.
- icons are selected and used for a disease state, being thyroid disease

- the icons are representative of being normal relative to thyroid disease and abnormal relative to thyroid disease
- the icons are defined as being such as to be representative of the textual content to be added to the supplementary report
- different icons are individually related to animal characteristics of age and animal grouping

11. I have also reviewed the Trendelenburg reference. I do not remotely see anything there which deals with icons which are of a nature of the invention of my current applications. There is a Microsoft Access program which uses icons of cut, paste, print or save etc. Cut, paste, print or save etc icons are not per se representative of the textual content of a report—they are simply empty icons or a short cut to effect an instruction. There is no per se textual content represented in the Trendelenburg icons. There is clearly no disclosure, teaching or suggestion in Trendelenburg of icons representative of the textual content to be added to the supplementary report. Trendelenburg is not remotely a disclosure or suggestion of different icons individually related to animal characteristics of age and animal grouping.

12. It was not readily obvious to me at that time, that the enhanced icon diagnosis and reporting system could solve the problems being experienced with basic animal diagnostic reporting. It would not have been obvious to anyone of skill in the art at the time and who was actually struggling with the real problems of effective and precise animal diagnostic reporting, that this totally different system would work and solve prior problems.

13. Tithe prior art references cited against the instant claims include references directed to different fields. These prior art references alone do not even provide even general guidance to the instant problem and claimed solution.

14. In fact, the combination of these references makes sense **only** when viewed in the context of the specification and claims. Alone, they don't get a person of ordinary skill in the art any closer to an expectation of success because they simply don't have any guidance, even when combined, to guide a person of ordinary skill in the art to the claimed result without significant

detective work. Further as indicated there is not even the remotest disclosure or suggestion of an icon or a GUI representative of the textual content to be added to the supplementary report.

15. I consider that the icon diagnostic reporting system of the present applications would not have been obvious at the time in the light of my prior diagnosis method in Dodds. It would have taken ingenuity to achieve the successful diagnosis system with the invented icon system.

All statements made herein of my own knowledge are true, all statements made hereon information and belief are believed to be true, and further these statements were made with the knowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under U.S.C. 1001, and may jeopardize the validity of the application of any patent issuing thereon.

Dated: Jan 24, 2008

W. Jean Dodds
W. JEAN DODDS

Exhibit A

CURRICULUM VITAE OF W. JEAN DODDS

Born Shanghai, China, January 4, 1941

Education

1964 D.V.M.(With honors and distinction)

Ontario Veterinary College, University of Toronto, Guelph, Ontario, Canada

1965 (Feb.) Postgraduate course in medical genetics, Faculty of Medicine, University of Toronto

1965 (May 25 - June 4) Postgraduate course in biochemistry, pathology, and immunology, Albany Medical College

Employment

1964-1965 Assistant Professor, Department of Physiological Sciences, Ontario Veterinary College, Guelph, Ontario, Canada

1965-1967 Research Scientist, Division of Laboratories and Research, NYS

Department of Health, Albany (Health Research, Inc.)

1967-1968 Associate Veterinarian (Hematologist), above address

1968-1969 Senior Research Scientist, above address

1969-1984 Senior Research Scientist III to VIII (NYS appointments)

1977-1983 Research Director, Laboratories for Veterinary Science, above address

1983-1988 Chief, Laboratory of Hematology, above address

1988-1992 Director, Comparative Hematology Laboratory, above address (half-time)

1986-present Founder and President, Hemopet, Santa Monica, CA

Membership on Study Sections, Editorial and Advisory Boards; Other Consultantships

1974-1978 Member, Animal Resources Advisory Committee, Division of Research Resources, National Institutes of Health.

1979-1983 Member, Hematology Study Section, Division of Research Grants, National Institutes of Health.

1982-2000 Hematology Consultant; Canine Practice, Feline Practice, Equine Practice.

1987-1995 Editorial Board, Veterinary Clinical Pathology.

1979-1980 Associate Editor, Laboratory Animal Science.

1970-present Referee for J Amer Vet Med Assoc; Am J Vet Res; J Am Anim Hosp Assoc; Blood; J Lab Clin Med; Brit J Haematol; Thromb Haemost; Thromb Res; Nat Sci Found; Amer Heart Assoc; Can Vet J; Can J Comp Med; Lab Anim Sci.

1972-1974 Member, Executive Committee, Council on Thrombosis, American Heart Association.

1981-1984 Member, Pathology Research Study Committee, American Heart Association

1983-1988 Executive Secretary, NYS Council on Human Blood and Transfusion Services, and NYS Hemophilia Advisory Panel.

1983-1985 Member, Office of Technology Assessment Panel on Alternatives to Animal Use in Testing and Experimentation, U.S. Congress.

1973-1978	Member, Subcommittee on Vertebrates, Genetics Society of America.
1973-1975	Member, Committee on Animal Models and Genetic Stocks, Institute of Laboratory Animal Resources (ILAR), National Research Council-National Academy of Sciences (NRC/NAS).
1975-1978	Chairman, Committee on Animal Models and Genetic Stocks, ILAR, NRC/NAS
1974-1976	Chairman, Committee on Animal Models for Thrombosis and Hemorrhagic Diseases, ILAR, NRC/NAS.
1975-1979	Member, Committee on Veterinary Medical Sciences, Assembly of Life Sciences, NRC/NAS.
1980-1984	Chairman, Committee on Veterinary Medical Sciences, Assembly of Life Sciences, NRC/NAS.
1975-1980	Vice-Chairman and Member, Executive Committee and Advisory Council, ILAR, NRC/NAS.
1974-1983	Chairman, Subcommittee on Animal Models, International Committee on Thrombosis and Haemostasis.
1976-1978	Member, Committee on Education, ILAR, NRC/NAS.
1978-1979	Chairman, Special ILAR Evaluation Panel for the Laboratory Animal Data Bank of National Library of Medicine, NRC/NAS.
1979-1983	Member and Vice-President, Board of Trustees, Scientist's Center for Animal Welfare, Washington, D.C.
1984-1988	President, Scientist's Center for Animal Welfare, Washington, D.C.
1984-1987	Member, Scientific Advisory Board, Otisville Biotech, Inc./Alliance Pharmaceuticals, San Diego, CA.
1986-present	Consultant (pro-bono), Veterinary Reference Laboratories, Animed (1986-1988); Professional Animal Laboratory (1990-1994), became Antech Diagnostics, Irvine, CA.
1986-present	President, Hemopet/Pet Life-Line, Santa Monica and Irvine, CA. Nonprofit national animal blood bank program.
1993-2002	Editor, Advances in Veterinary Science and Comparative Medicine, Academic Press, San Diego, CA.
2004-2005	Member, Committee on National Needs for Research in Veterinary Medicine, NRC/NAS.

Other Appointments

1968-1979	Consultant Veterinarian, Veteran's Administration Medical Center, Albany, NY.
1970-1979	Adjunct Associate Professor of Medicine, Albany Medical College, Albany, NY.
1978-2000	Adjunct Associate Professor of Medicine, University of Pennsylvania School of Veterinary Medicine, Philadelphia, PA.
1979-1990	Adjunct Professor of Pathology, NYS College of Veterinary Medicine, Cornell University, Ithaca, NY.
1980-1990	Adjunct Professor, Department of Physiology, Albany Medical College.
1980-1990	Adjunct Professor, Department of Medicine, Albany Medical College.
1981-1990	Adjunct Professor of Pathology, Albany Veteran's Administration Medical Center.
1980-1990	Visiting Lecturer, Tuft's University School of Veterinary Medicine, Boston, MA.
1983-1992	Adjunct Professor, Department of Biological Sciences, State University of New York at Albany (SUNYA).
1983-1988	Acting Associate Chairman, Department of Laboratory Medicine, Graduate School of Public Health Sciences, SUNYA.

- 1983-1990 Adjunct Professor, Department of Pathology, Albany Medical College.
- 1987-1992 Member, Veterinary Advisory Committee, Biopure Corporation, Boston, MA.
- 1991-1992 Veterinary Consultant, Cryopharm, Pasadena, CA.
- 1991-1998 President, Association of Veterinary Transfusion Medicine.
- 1998-2001 Newsletter Editor, Association of Veterinary Hematology and Transfusion Medicine

Teaching Experience

- 1968-present Continuing medical education credit courses in hematology, immunology and endocrinology for veterinarians and veterinary technologists locally, nationally and internationally.
- 1975-1985 Continuing medical education credit courses and seminars in hematology for physicians and medical technologists, Department of Medicine, Albany Medical College, Union University; Veteran's Administration Medical Center; and Northeastern Region of American Red Cross, Albany, NY.
- 1976-1980 Program Director, NIH/NRSA Postdoctoral research training grant in comparative hemostasis. Four (4) postdoctoral trainees were trained.
- 1978-1985 Annual undergraduate courses in hematology for veterinary students at NYS College of Veterinary Medicine, Cornell University, Ithaca, NY; and Tufts University School of Veterinary Medicine, Boston, MA.
- 1978-2000 Annual undergraduate veterinary student courses at University of Pennsylvania School of Veterinary Medicine, Philadelphia, PA.
- 1993-1999 Veterinary Consultant, Baxter Edwards CVS Division, Irvine, CA.

Honors and Awards

- 1974 Woman Veterinarian of the Year, Women's Veterinary Medical Association, Denver, Co.
- 1977 Region I Award for Outstanding Service to the Veterinary Profession, American Animal Hospital Association, Cherry Hill, NJ.
- 1978 Award of Merit in Recognition of Special Contributions to the Veterinary Profession, American Animal Hospital Association, Salt Lake City, UT.
- 1978 Gaines Fido Award, Dogdom's Woman of the Year, Gaines Research Center, New York, NY
- and 1990
- 1979 Anstamm Achievement Award, in memory of Senator Anthony Stamm (MI), Scottish Terrier Club of America.
- 1979 Commendation for Service, Albany Veteran's Administration Medical Center.
- 1984 Centennial Medal Award, University of Pennsylvania School of Veterinary Medicine.
- 1987 Elected Distinguished Practitioner, National Academy of Practice in Veterinary Medicine.
- 1994 Holistic Veterinarian of The Year, American Holistic Veterinary Medical Association.
- 2004 Veterinarian of the Year, All-Saints Blessings for the Animals

Professional Societies

- | | |
|--|--------------------------------------|
| American Veterinary Medical Association | American Society of Hematology |
| Canadian Veterinary Medical Association | American Association of Pathologists |
| Ontario Veterinary Medical Association | American Heart Association |
| American Society of Veterinary Clinical Pathologists | American Association of Blood Banks |

Areas of Expertise

Comparative thrombosis and hemostasis
Animal models
Comparative immunohematology and endocrinology
Laboratory animal medicine; animal welfare

Patents

U.S. Patent 5,196,311	ELISA Test for von Willebrand Factor
U.S. Patent 5,202,264	ELISA Using Multi-Species Antibodies for Detection of von Willebrand Factor in Multiple Species
U.S. Patent 5,486,685	Oven with Food Presence Indicator
U.S. Patent 5,830,709	Detection Method for Homologous Portions of a Class of Substances
U.S. Patent 6,287,254	Animal Health Diagnostics
U.S. Patent 6,730,023	Animal Genetic and Health Profile Database Management
U.S. Patent 9,419,192	Animal Genetic and Health Profile Database Management
U.S. Patent 9,898,193	Animal Health Care, Well-Being and Nutrition
U.S. Patent 7,029,441	Animal Health Care, Well-Being and Nutrition
